

MOHD UJAID

Full Stack Developer (MERN/PERN Stack)

📍 New Delhi, India 📞 +91-8383825439 ✉️ mdujjaid0786@gmail.com 🌐 [mohdujaid](#) 🔄 [Mohd-Ujaid](#) 📄 [Mohd Ujaid](#)

PROFESSIONAL SUMMARY

Full Stack Developer skilled in building and deploying web applications using the MERN and PERN stacks. Creates responsive user interfaces with React and Tailwind CSS, and develop scalable REST APIs with Node.js and Express. Comfortable working with PostgreSQL and MongoDB, ORMs (Prisma and Mongoose), and Docker-based local development.

PROJECTS

CodeVue 🗄️ | [React.js](#), [Tailwind CSS](#), [JavaScript](#), [Node.js](#), [Express.js](#), [PostgreSQL](#), [Prisma](#), [Judge0](#), [Docker](#)

- **A Full Stack DSA practice platform designed to help users improve coding skills by providing instant feedback from a dynamic code evaluation engine.**
- Developed a robust backend featuring a suite of 15+ RESTful API endpoints with Node.js and Express to manage user authentication, problem submissions, and real-time status tracking.
- Implemented a responsive React.js dashboard that visualizes user performance analytics, leading to a more engaging and insightful practice experience for users.
- Containerized the PostgreSQL database with Docker to create a consistent, isolated development environment, significantly reducing setup time and ensuring seamless deployment.

BlogIT 🗄️ | [React.js](#), [Tailwind CSS](#), [JavaScript](#), [Node.js](#), [Express.js](#), [MongoDB](#), [HTML](#), [CSS](#)

- **A Full Stack MERN application that serves as a complete blogging platform, supporting over 1000+ user interactions, including posts, comments, and likes.**
- Designed and implemented a scalable NoSQL database schema in MongoDB and built a secure backend API to handle all CRUD operations efficiently.
- Created a personalized user dashboard for content management, allowing bloggers to track post interactions and view engagement metrics in real-time.
- Developed a dynamic search functionality that allows users to explore and connect with other bloggers on the platform, enhancing community engagement.

MoviesX 🗄️ | [HTML](#), [CSS](#), [JavaScript](#), [TMDB API](#),

- **Developed a client-side movie discovery web app that dynamically fetches and displays data from 5+ endpoints of the live TMDB API.**
- Wrote over 1,000 lines of clean, modular vanilla JavaScript to handle asynchronous API calls, DOM manipulation, and state management for a seamless user experience.
- Optimized API call logic and image loading, resulting in a 30% improvement in perceived page load speed and a fully responsive interface compatible with all device sizes.
- Managed the end-to-end development lifecycle, from initial design to final deployment on Netlify, ensuring global availability and high-speed access for all users.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java(basic)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Zustand, React Context API,

Backend: Node.js, Express.js, RESTful APIs, Authentication (JWT, OAuth 2.0), Session-based Auth

Database & ORM: PostgreSQL, MongoDB, Prisma, Mongoose

Developer Tools & Deployment: Git, GitHub, VS Code, Postman, Docker, Vercel, Netlify

EDUCATION

Bachelor of Technology in Computer Science Engineering

Satyug Darshan Institute of Engineering and Technology

2021 – 2025

Haryana, India
